New Mexico One Call
Gary Sloman
PO Box 27192
Albuquerque NM  87125

Dear Gary,

The Pipeline Association for Public Awareness is a nonprofit corporation that was established in 2004 by a group of pipeline companies to assist with public awareness efforts.

In 2005, the Excavator Direct Mail Program was initiated. The purpose of this program is to provide general pipeline safety information to commercial excavators. In 2006, the Excavation Safety Guide – Pipeline Safety Edition was mailed to commercial excavators in eight states. New Mexico was one of the states included the 2006 program. Over 8,600 commercial excavators in your state have already received the guide. In addition, these excavators have been invited to participate in an online web survey which will provide valuable insight into the excavator’s general knowledge of one-call requirements, excavation practices, identification of pipeline hazards and response to pipeline emergencies. The survey results will be available early in 2007.

100 copies of the Excavation Safety Guide – Pipeline Safety Edition are enclosed for your use. Please feel free to use these guides in your own public awareness efforts. Additional copies may be ordered directly from Infrastructure Resources at www.excavationsafetyguide.com.

In 2007, One-Call organizations can participate in this program as sustaining members of the Association. If you are interested in learning more about the Pipeline Association for Public Awareness and the programs offered, please visit the web site at www.pipelineawareness.org. We welcome your interest and participation.

Please consider supporting our efforts by placing a link to our home page on your web site.

Thank you,

Pipeline Association for Public Awareness
