Louise Nelson  
Alaska Digline  
2221 E. Northern Lights Blvd. Suite 136  
Anchorage, AK 99508

Dear Louise,

The **Pipeline Association for Public Awareness** is a nonprofit corporation that was established in 2004 to assist pipeline companies with public awareness efforts and improve public safety in the vicinity of pipelines.

In 2005, our Excavator Direct Mail Program was initiated. The purpose of this program is to provide general pipeline safety information to commercial excavators. In 2006, the *Excavation Safety Guide – Pipeline Safety Edition* was mailed to commercial excavators in eight states including Wyoming, Colorado, New Mexico, Arizona, Kansas, Louisiana, Alabama and Mississippi. Over 107,000 commercial excavators in these states have received the guide. In addition, these excavators were invited to participate in an online survey which will provide valuable insight into the excavator’s general knowledge of one-call requirements, excavation practices, identification of pipeline hazards and response to pipeline emergencies. The survey results will be available early in 2007.

Several copies of the *Excavation Safety Guide – Pipeline Safety Edition* are enclosed for your review. Please feel free to use these guides in your own public awareness efforts. Additional copies may be ordered directly from Infrastructure Resources at [www.excavationsafetyguide.com](http://www.excavationsafetyguide.com).

In 2007, One-Call organizations may participate in this program as sustaining members of the Association. If you are interested in learning more about the Pipeline Association for Public Awareness and the programs offered, please visit the web site at [www.pipelineawaress.org](http://www.pipelineawaress.org). We welcome your interest and participation.

Please consider supporting our efforts by placing a link to our home page on your web site.

Thank you,

Greensboro, NC 27407

Dear George,

The **Pipeline Association for Public Awareness** is a nonprofit corporation that was established in 2004 to assist pipeline companies with public awareness efforts and improve public safety in the vicinity of pipelines.

In 2005, our Excavator Direct Mail Program was initiated. The purpose of this program is to provide general pipeline safety information to commercial excavators. In 2006, the **Excavation Safety Guide – Pipeline Safety Edition** was mailed to commercial excavators in eight states including Wyoming, Colorado, New Mexico, Arizona, Kansas, Louisiana, Alabama and Mississippi. Over 107,000 commercial excavators in these states have received the guide. In addition, these excavators were invited to participate in an online survey which will provide valuable insight into the excavator’s general knowledge of one-call requirements, excavation practices, identification of pipeline hazards and response to pipeline emergencies. The survey results will be available early in 2007.

Several copies of the **Excavation Safety Guide – Pipeline Safety Edition** are enclosed for your review. Please feel free to use these guides in your own public awareness efforts. Additional copies may be ordered directly from Infrastructure Resources at [www.excavationsafetyguide.com](http://www.excavationsafetyguide.com).

In 2007, One-Call organizations may participate in this program as sustaining members of the Association. If you are interested in learning more about the Pipeline Association for Public Awareness and the programs offered, please visit the web site at [www.pipelineawareness.org](http://www.pipelineawareness.org). We welcome your interest and participation.

Please consider supporting our efforts by placing a link to our home page on your web site.

Thank you,

Jim Holzer
Gopher State One Call - Minnesota
2020 Centre Point Blvd
Mendota Heights, MN 55120

Dear Jim,

The Pipeline Association for Public Awareness is a nonprofit corporation that was established in 2004 to assist pipeline companies with public awareness efforts and improve public safety in the vicinity of pipelines.

In 2005, our Excavator Direct Mail Program was initiated. The purpose of this program is to provide general pipeline safety information to commercial excavators. In 2006, the Excavation Safety Guide – Pipeline Safety Edition was mailed to commercial excavators in eight states including Wyoming, Colorado, New Mexico, Arizona, Kansas, Louisiana, Alabama and Mississippi. Over 107,000 commercial excavators in these states have received the guide. In addition, these excavators were invited to participate in an online survey which will provide valuable insight into the excavator’s general knowledge of one-call requirements, excavation practices, identification of pipeline hazards and response to pipeline emergencies. The survey results will be available early in 2007.

Several copies of the Excavation Safety Guide – Pipeline Safety Edition are enclosed for your review. Please feel free to use these guides in your own public awareness efforts. Additional copies may be ordered directly from Infrastructure Resources at www.excavationsafetyguide.com.

In 2007, One-Call organizations may participate in this program as sustaining members of the Association. If you are interested in learning more about the Pipeline Association for Public Awareness and the programs offered, please visit the web site at www.pipelineawareness.org. We welcome your interest and participation.

Over 107,000 commercial excavators in these states have received the guide. In addition, these excavators were invited to participate in an online survey which will provide valuable insight into the excavator’s general knowledge of one-call requirements, excavation practices, identification of pipeline hazards and response to pipeline emergencies. The survey results will be available early in 2007.

Several copies of the Excavation Safety Guide – Pipeline Safety Edition are enclosed for your review. Please feel free to use these guides in your own public awareness efforts. Additional copies may be ordered directly from Infrastructure Resources at www.excavationsafetyguide.com.

In 2007, One-Call organizations may participate in this program as sustaining members of the Association. If you are interested in learning more about the Pipeline Association for Public Awareness and the programs offered, please visit the web site at www.pipelineawareness.org. We welcome your interest and participation.

Dear Robert,

The Pipeline Association for Public Awareness is a nonprofit corporation that was established in 2004 to assist pipeline companies with public awareness efforts and improve public safety in the vicinity of pipelines.

In 2005, our Excavator Direct Mail Program was initiated. The purpose of this program is to provide general pipeline safety information to commercial excavators. In 2006, the Excavation Safety Guide – Pipeline Safety Edition was mailed to commercial excavators in eight states including Wyoming, Colorado, New Mexico, Arizona, Kansas, Louisiana, Alabama and Mississippi. Over 107,000 commercial excavators in these states have received the guide. In addition, these excavators were invited to participate in an online survey which will provide valuable insight into the excavator’s general knowledge of one-call requirements, excavation practices, identification of pipeline hazards and response to pipeline emergencies. The survey results will be available early in 2007.
